List of Figures

1 Functional Requirements Evaluation

Overall, an evaluation of functional requirements reveals near, if not complete coverage. The tests written for the projects turned out to be quite useful, as many caught bugs or business-errors that would have otherwise gone unnoticed. Those will be discussed below. As for the rest of the functional requirements, many were mundane, general, or crucial enough to have already been satisfied earlier. Those will not be discussed, as their complete satisfaction has already been verified countless times.

The list below refers to each functional requirement by its numerical identifier, as listed in the System Requirements Specification. Please refer to the SRS if any confusion arises due to this.

FR.16: When performing level tests, a strange anomaly led to one test constantly failing. The test revealed that the player, in fact, did not begin at the first level. Due to an off-by-one error and slight miscommunication between developers, the current level depth the player was on was i in some places and i+1 in others. As soon as the test revealed this, the problem was remedied globally.

FR.19: Whenever the player uncovers a new dungeon level (including the very first level), an algorithm decides on a position in which to place the user initially. This algorithm while appearing flawless, actually had a very slight chance of placing the player in an unreachable location, surrounded by walls, doomed forever. With the automatic tests running thousands upon thousands of simulations, the bug was quickly revealed, and remedied.

FR.39: Working with C++ has its benefits, but also its drawbacks. An anomaly in the way C++ handles integers revealed a very serious bug in the code, in which player armor could reach utterly ridiculous values, rendering them effectively invincible. By simulating every possibility of armor that can be made, this bug was caught and dispatched.

6 Automated Testing

6.1 Automated Testing Strategy

For this project we elected not to use a 3rd party testing library. We made this decision to ease configuration/installation problems and reduce our dependencies, as we judged it would not be necessary. Instead a series of files (labeled test.foobar.cpp) in the repository hold tests, which are run by our custom test runner. These automated tests are run on command by executing the produced executable, or by the continuous integration script run whenever changes are pushed to the central repository. The results of these tests are automatically reported, resulting in a failed or successful build.

6.2 Specific System Tests

The following is a list of all system tests in the project.

Name:	Amulet Construction
Initial State:	None
Input:	Coordinate, context value
Expected Output:	Amulet object in valid initial state
Name:	Armor Construction 1
Initial State:	None
Input:	Coordinate
Expected Output:	Armor object in valid initial state
Name:	Armor Construction 2
Initial State:	None
Input:	Coordinate, context value, type value
Expected Output:	Armor object in valid initial state
Name:	Armor Identification
Initial State:	Cursed Armor
Input:	None
Expected Output:	Verification that armor is identified
Name:	Armor Identification
Initial State:	Cursed Armor
Input:	None
Expected Output:	Verification that armor is identified

Armor Curse	
Cursed Armor	
None	
Verification that armor is cursed	
Armor Enchantment	
Cursed Armor	
Curse level	
Verification that armor enchantment is correct	
Armor Rating	
Cursed Armor	
None	
Verification that armor rating is correct	
Coordinate Ordering	
None	
(0,0) coordinate and $(1,1)$ coordinate	
Verification that $(0,0)$; $(1,1)$	
Coordinate Equality	
None	
Two $(0,0)$ coordinates	
Verification that the two inputs are equal	
Coordinate Inequality	
None	
(0,0) coordinate and $(1,1)$ coordinate	
Verification that the two inputs are not equal	
Coordinate Addition	
None	
(2,3) coordinate and $(1,2)$ coordinate	
(3,5) coordinate	
Coordinate Subtraction	
None	
(2,3) coordinate and (1,2) coordinate	
(1,1) coordinate	
Feature Construction	
None	
Symbol, coordinate, visibility, color	
Feature object in valid initial state	

Initial State:	Feature with given symbol	
Input:	Symbol	
Expected Output:	Verification that feature's symbol matches given	
Name:	Feature Invisibility Check	
Initial State:	Invisible feature	
Input:	None	
Expected Output:	Verification that feature is invisible	
Name:	Feature Visibility Check	
Initial State:	Visible feature	
Input:	None	
Expected Output:	Verification that feature is visible	
Name:	Feature Location Check	
Initial State:	Feature with given location	
Input:	Coordinate	
Expected Output:	Verification that feature's location matches given coordinate	
Name:	Food Construction	
Initial State:	None	
Input:	Coordinate and context value	
Expected Output:	Food object in valid initial state	
Name:	Food Eating	
Initial State:	Food and player objects	
Input:	None	
Expected Output:	Verification that food has increased the player's food life by an appropria	
Name:	GoldPile Construction	
Initial State:	None	
Input:	Coordinate, gold amount value	
Expected Output:	GoldPile object in valid initial state	
Name:	GoldPile Quantity Check	
Initial State:	GoldPile with given amount of gold	
Input:	Amount of gold value	
Expected Output:	Verification that gold's amount matches given amount	
Name:	Item Construction 1	
Initial State:	None	
Input:	Symbol, coordinate, context value, item class specifier, name value, psued	
Expected Output:	Item object in valid initial state	
	The Control of the Co	

Name:

Initial State:

Item Construction 2

None

Input:	Symbol, coordinate, context value, item class specifier, name value, psued	
Expected Output:	Item object in valid initial state	
Name:	Name Vector Check	
Initial State:	None	
Input:	Vector of item names	
Expected Output:	Shuffled vector of item names	
Name:	Item Curse Check	
Initial State:	Uncursed item	
Input:	None	
Expected Output:	Verification that item is uncursed	
Name:	Item Curse/Effect Check 1	
Initial State:	Uncursed item to which the cursed effect has been applied	
Input:	None	
Expected Output:	Verification that item is cursed	
Name:	Item Curse/Effect Check 2	
Initial State:	Cursed item whose curse effect has been removed	
Input:	None	
Expected Output:	Verification that item is uncursed	
Name:	Item Unindentified Check	
Initial State:	Identified item	
Input:	None	
Expected Output:	Verification that item is unidentified	
Name:	Item Identified Check	
Initial State:	Unidentified item	
Input:	None	
Expected Output:	Verification that item is identified	
Name:	Item Display-Name Check 1	
Initial State:	Unidentified item	
Input:	Psuedoname	
Expected Output:	Verification that item's display name matches psuedoname	
Name:	Item Display-Name Check 2	
Initial State:	Identified item	
Input:	True name	
Expected Output:	Verification that item's display name matches true name	
Name:	ItemZone Containment Check 1	
Initial State:	ItemZone with 2 items	
Input:	None	

Expected Output:	Verification that ItemZone contains the first item
Name:	ItemZone Containment Check 2
Initial State:	ItemZone with 2 items
Input:	None
Expected Output:	Verification that ItemZone contains the second item
Name:	ItemZone Empty Check
Initial State:	ItemZone with 2 items
Input:	None
Expected Output:	Verification that ItemZone is not empty
Name:	ItemZone Size Check
Initial State:	ItemZone with 2 items
Input:	None
Expected Output:	Verification that ItemZone's size is 2
Name:	ItemZone Keybind Check 1
Initial State:	ItemZone with 2 items
Input:	None
Expected Output:	Verification that first item is bound to 'a' key
Name:	ItemZone Keybind Check 2
Initial State:	ItemZone with 2 items
Input:	None
Expected Output:	Verification that second item is bound to 'b' key
Name:	ItemZone Contents Retrieval 1
Initial State:	ItemZone with 2 items
Input:	None
Expected Output:	Item map with exactly 1 copy of first item
Name:	ItemZone Contents Retrieval 2
Initial State:	ItemZone with 2 items
Input:	None
Expected Output:	Item map with exactly 1 copy of second item
Name:	ItemZone Removal
Initial State:	ItemZone with 2 items
Input:	Removal command
Expected Output:	ItemZone with only second item
Name:	ItemZone Keybind Persistence
Initial State:	ItemZone with first item removed
Input:	None
Expected Output:	Verification that second item is still bound to 'b'

ranie.	Remzone Weight Emorcement	
Initial State:	Empty ItemZone	
Input:	Attempt to add 500 pieces of armor to ItemZone	
Expected Output:	ItemZone with max-weight worth of armor	
Name:	Level Construction	
Initial State:	None	
Input:	Depth, player object	
Expected Output:	Level object in valid initial state	
Name:	Level Depth Check	
Initial State:	Level with given depth	
Input:	Depth value	
Expected Output:	Verification that level's depth matches given value	
Name:	Level BFSPerp Diagonal Small	
Initial State:	Empty level object	
Input:	Pair of coordinates diagonally adjacent	
Expected Output:	Path between coordinates with expected length, utilizing taxicab movement	
Name:	Level BFSPerp Horizontal	
Initial State:	Empty level object	
Input:	Pair of coordinates with equal y-values	
Expected Output:	Path between coordinates with expected length, utilizing taxicab moveme	
Name:	Level BFSPerp Vertical	
Initial State:	Empty level object	
Input:	Pair of coordinates with equal x-values	
Expected Output:	Path between coordinates with expected length, utilizing taxicab moveme	
Name:	Level BFSDiag Horizontal	
Initial State:	Empty level object	
Input:	Pair of coordinates with equal y-values	
Expected Output:	Path between coordinates with expected length, utilizing orthogonal move	
Name:	Level BFSDiag Vertical	
Initial State:	Empty level object	
Input:	Pair of coordinates with equal x-values	
Expected Output:	Path between coordinates with expected length, utilizing orthogonal move	
Name:	Level BFSPerp Diagonal	
Initial State:	Empty level object	
Input:	Pair of coordinates on diagonal line	
Expected Output:	Path between coordinates with expected length, utilizing taxicab movement	
Name:	Level Starting Position	

ItemZone Weight Enforcement

Name:

Initial States	Empty level object	
Initial State:	Empty level object	
Input:	None	
Expected Output:	Valid starting position coordinate	
Name:	Level getAdjPassable	
Initial State:	Empty level object	
Input:	Coordinate	
Expected Output:	List of coordinates orthogonally adjacent to given coordinate	
Name:	Level Path Generation	
Initial State:	Player object and generated level	
Input:	Series of path requests between random coordinates	
Expected Output:	Valid paths between locations	
Name:	Level Connectedness	
Initial State:	Player object and generated level	
Input:	Series of path requests between all rooms in the level	
Expected Output:	Valid paths between each room	
Name:	Level Staircase Check	
Initial State:	Player object and generated level	
Input:	None	
Expected Output:	Verification that level contains a staircase	
Name:	Level GoldPile Check	
Initial State:	Player object and generated level	
Input:	None	
Expected Output:	Verification that level contains at least one goldpile	
Name:	Monster Construction	
Initial State:	None	
Input:	Symbol, coordinate, armor value, HP value, exp value, level value, maxHI	
Expected Output:	Monster object in valid initial state	
Name:	Dice-Math 1	
Initial State:	None	
Input:	1 1-sided die	
Expected Output:	Sum of values of 1	
Name:	Dice-Math 2	
Initial State:	None	
Input:	2 1-sided die	
Expected Output:	Sum of values of 2	
Name:	Dice-Math 3	
Initial State:	None	

Input:	1 2-sided die
Expected Output:	1 = Sum of values = 2
Name:	Dice-Math 4
Initial State:	None
Input:	3 4-sided die
Expected Output:	3 = Sum of values = 12
Name:	Mob Armor Check
Initial State:	Mob object
Input:	None
Expected Output:	Verification mob armor is in valid range
Name:	Mob HP Check 1
Initial State:	Mob with given HP value
Input:	HP value
Expected Output:	Verification mob has correct HP value
Name:	Mob MaxHP Check
Initial State:	Mob with given MaxHP value
Input:	MaxHP value
Expected Output:	Verification mob has correct MaxHP value
Name:	Mob Level Check
Initial State:	Mob with given level value
Input:	Level value
Expected Output:	Verification mob has correct level value
Name:	Mob Location Check
Initial State:	Mob with given location
Input:	Coordinate
Expected Output:	Verification mob has correct location
Name:	Mob Name Check
Initial State:	Mob with given name
Input:	Name value
Expected Output:	Verification mob has correct name
Name:	Mob setMaxHP
Initial State:	Mob with default MaxHP
Input:	setMaxHP command with MaxHP value
Expected Output:	mob with given MaxHP value
Name:	Mob setcurrentHP
Initial State:	Mob with default currentHP
Input:	setCurrentHP command with currentHP value

Name: Initial State: Input: Input: None Expected Output: Verification mob is alive Name: Input: Input: Input: Name: Mob HP Check 2 Initial State: Living Mob object Hit command for Lil mob's current HP Expected Output: Verification mob has HP i= 0 Name: None: Input: None Expected Output: Verification mob is dead Name: Input: None Expected Output: Verification mob is dead Name: Input: Symbol, coordinate Expected Output: None Symbol, coordinate Expected Output: None: Input: Symbol, coordinate Expected Output: Nonster object in valid initial state Name: Input: SetFlag command to make monster invisible Expected Output: Invisible monster object Name: Initial State: Initial State: Initial State: Input: Aggrevate Initial State: Input: Aggrevate command Expected Output: Name: Initial State: Input: Aggrevate command Expected Output: Name: Monster Damage Calculation Initial State: Input: CalculateDamage command Expected Output: None Monster Hit Chance Initial State: Input: Amoster and player objects Input: CalculateHit Change command Expected Output: Hit chance in valid range Name: Input: None Monster Armor Check Initial State: Monster object None None None Expected Output: Verification that monster armor is in valid range	Expected Output:	mob with given currentHP value
Input: None Expected Output: Verification mob is alive Name: Mob HP Check 2 Initial State: Living Mob object Input: Hit command for iti mob's current HP Expected Output: Verification mob has HP i= 0 Name: Mob Dead Check 2 Initial State: Dead mob object Input: None Expected Output: Verification mob is dead Name: Monster Construction Initial State: None Input: Symbol, coordinate Expected Output: Monster object in valid initial state Name: Monster Flag/Invisibility Initial State: Visible monster object Input: SetFlag command to make monster invisible Expected Output: Invisible monster object Input: Aggrevate Initial State: Idling, sleeping monster object Input: Aggrevate command Expected Output: Monster Damage Calculation Initial State: Monster object Input: calculateDamage command Expected Output: Correct amount of damage Name: Monster and player objects Input: calculateHitChange command Expected Output: Hit chance in valid range Name: Monster Armor Check Initial State: Monster object Input: calculateHitChange command Expected Output: Hit chance in valid range Name: Monster Armor Check Initial State: Monster object Input: None		Mob Dead Check 1

Initial State: Monster object Input: calculateDamage command Expected Output: Correct amount of damage Name: Monster Hit Chance Initial State: Monster and player objects Input: calculateHitChange command Expected Output: Hit chance in valid range Name: Monster Armor Check Initial State: Monster object Input: None	Expected Output:	Awake, chasing monster object
Input: calculateDamage command Expected Output: Correct amount of damage Name: Monster Hit Chance Initial State: Monster and player objects Input: calculateHitChange command Expected Output: Hit chance in valid range Name: Monster Armor Check Initial State: Monster object Input: None	Name:	Monster Damage Calculation
Expected Output:Correct amount of damageName:Monster Hit ChanceInitial State:Monster and player objectsInput:calculateHitChange commandExpected Output:Hit chance in valid rangeName:Monster Armor CheckInitial State:Monster objectInput:None	Initial State:	Monster object
Name: Monster Hit Chance Initial State: Monster and player objects Input: calculateHitChange command Expected Output: Hit chance in valid range Name: Monster Armor Check Initial State: Monster object Input: None	Input:	calculateDamage command
Initial State: Monster and player objects Input: calculateHitChange command Expected Output: Hit chance in valid range Name: Monster Armor Check Initial State: Monster object Input: None	Expected Output:	Correct amount of damage
Input: calculateHitChange command Expected Output: Hit chance in valid range Name: Monster Armor Check Initial State: Monster object Input: None	Name:	Monster Hit Chance
Expected Output: Hit chance in valid range Name: Monster Armor Check Initial State: Monster object Input: None	Initial State:	Monster and player objects
Name: Monster Armor Check Initial State: Monster object Input: None	Input:	calculateHitChange command
Initial State: Monster object Input: None	Expected Output:	Hit chance in valid range
Input: None	Name:	Monster Armor Check
	Initial State:	Monster object
Expected Output: Verification that monster armor is in valid range	Input:	None
	Expected Output:	Verification that monster armor is in valid range

Name:	Invisible Monster Name Check
Initial State:	Invisible uonster object
Input:	None
Expected Output:	Verification monster has hidden name
Name:	Visible Monster Name Check
Initial State:	Invisible monster object
Input:	RemoveFlag command to make monster invisible
Expected Output:	Verification monster has real name
Name:	Monster Symbol/Level Association
Initial State:	None
Input:	Depth value
Expected Output:	Set of symbols for monsters that are valid candidates for given depth
Name:	Monster Symbol/Treasure/Level Association
Initial State:	None
Input:	Depth value
Expected Output:	Set of symbols for monsters that are valid candidates for given depth for
Name:	PlayerChar Initial Amulet Check
Initial State:	Just initialized playerchar object
Input:	None
Expected Output:	Verification the game does not believe the player has the amulet
Name:	PlayerChar Initial HP Check
Initial State:	Just initialized playerchar object
Input:	None
Expected Output:	Verification playerchar has full hp
Name:	PlayerChar Level-Up Exp
Initial State:	Playerchar object at initial level
Input:	Exp input into playerchar object
Expected Output:	Playerchar object with increased level
Name:	PlayerChar Level-Up Manual
Initial State:	Playerchar object
Input:	Level-up command
Expected Output:	Playerchar object with increased level
Name:	PlayerChar Damage
Initial State:	Playerchar object at full hp
Input:	Series of damage commands applied to playerchar object
Expected Output:	Playerchar object with less than full hp
Name:	PlayerChar UnArmed 1

Initial State:	Unarmed playerchar object
Input:	calculateDamage command
Expected Output:	0 damage value
Name:	PlayerChar Armed
Initial State:	Playerchar object armed with weapon
Input:	calculateDamage command
Expected Output:	Damage value ¿ 0
Name:	PlayerChar Stow Weapon
Initial State:	Playerchar object armed with uncursed weapon
Input:	removeWeapon command
Expected Output:	PlayerChar object unarmed
Name:	PlayerChar UnArmed 2
Initial State:	Armed playerchar object
Input:	removeWeapon command, then calculateDamage
Expected Output:	0 damage value
Name:	PlayerChar Remove Non-Armor
Initial State:	Playerchar object with no armor
Input:	removeArmor command
Expected Output:	Boolean indicating failure to remove armor
Name:	PlayerChar Remove Armor
Initial State:	Playerchar object with uncursed armor
Input:	removeArmor command
Expected Output:	Playerchar object without armor
Name:	
Initial State:	
Input:	
Expected Output:	

7 Trace to Requirements

Ori

8 Trace to Modules

The following table re-iterates the modules of the project, along with their respective domain and module ID. The module IDs are used to refer to modules in the trace. More about the modules can be found in the Module Guide.

Table 3: Module Hierarchy

Level 1	Level 2	
Hardware-Hiding	BasicIO	M1
Module	Doryen	M2
	Input Format	M3
	External	M4
	Item	M5
Behaviour-Hiding	Level	M6
Module	LevelGen	M7
	MainMenu	M8
	Monster	M9
	PlayerChar	M10
	RipScreen	M11
	PlayState	M12
	UIState	M13
	Coord	M14
	Feature	M15
	ItemZone	M16
C.C. D	MasterController	M17
Software Decision	Mob	M18
Module	Random	M19
	Terrain	M20

The following table maps test files, which implement tests, to specific modules, given by their IDs.

Table 4: **Test-Module Trace**

File	Related Module(s)
test.amulet.cpp	M7, M12, M13
test.armor.cpp	M5, M10, M18
test.coord.cpp	M2, M5, M6, M7, M14, M19
test.feature.cpp	M5, M15, M16, M10
test.food.cpp	M5, M6, M7, M10, M12
test.goldpile.cpp	M5, M6, M7, M9, M10, M15, M16
test.item.cpp	M5, M15
test.itemzone.cpp	M5, M6, M14, M15, M16
test.level.cpp	M5, M6, M9, M10, M14, M15, M19
test.levelgen.cpp	M5, M6, M9, M14, M15, M19, M20
test.main.cpp	None (Puts everything together)
test.mob.cpp	M9, M10, M12, M13, M14, M18
test.monster.cpp	M9, M14, M18
test.playerchar.cpp	M5, M6, M10, M11, M12, M13, M14, M15, M16, M17, M18
test.potion.cpp	M5, M6, M7, M9, M10, M15, M16
test.ring.cpp	M5, M6, M7, M9, M10, M15, M16
test.room.cpp	M6, M7, M14, M19
test.scroll.cpp	M5, M6, M7, M9, M10, M15, M16
test.stairs.cpp	M7, M15, M17, M20
test.terrain.cpp	M6, M7, M19, M20
test.testable.cpp	Defines test-suite
test.testable.h	Defines test-suite
test.trap.cpp	M6, M7, M10, M13, M15
test.tunnel.cpp	M6, M5, M14
test.uistate.cpp	M4, M8, M11, M12, M13, M17
test.wand.cpp	M5, M6, M7, M9, M10, M15, M16
test.weapon.cpp	M5, M6, M7, M9, M10, M15, M16
